Hands-on Exercise No. 1
DigiSkills 3.0 Batch-04
Full Stack Development with MERN

Total Marks: 10

Due Date: 03/09/2026

Instructions:

Please read the following instructions carefully before submitting this Hands-on Exercise:

- Use MS Word to prepare exercise solution.
- You may consult tutorials and videos if the concept is not clear.
- Your submitted exercise will not be considered/counted if:
 - It is submitted after due date.
 - It is not in the required format (doc or .docx) ▪ It does not open, or file is corrupt.
 - It is copied (partial or full) from any source (websites, forums, students, etc.)

Learning Outcome:

After completing this exercise, you shall be able to:

- Create a basic Personal Profile Web Page using HTML elements such as headings, paragraphs, lists, links, and images.
- Apply CSS or TailwindCSS to improve the layout, colors, spacing, and responsiveness of a web page.
- Initialize a Git repository, commit project files, and upload the project to a remote Git repository such as GitHub

Problem Statement

In this hands-on exercise, you are required to create a Personal Profile Web Page and manage its code using Git. The objective is to practice the basic front-end development concepts and version control commands covered in Lectures 01-36.

You can use any code editor such as VS Code to write your HTML and CSS/TailwindCSS code. After completing each part, take screenshots of your code, browser output, Git commands, and Git repository, then paste them into a single MS Word (.doc/.docx) file as your final solution submission.

Tasks:

Question 1: Personal Profile Web Page

Part 1: Create a Personal Profile Web Page using HTML only. (Marks 3) □

Add a proper page title.

- Add your name as the main heading.
- Add an About Me section using paragraphs.
- Add a Skills section using a list.
- Add a Contact section using email/contact link.
- Attach screenshots of your HTML code and browser output.

Part 2: Apply CSS or TailwindCSS on the same Personal Profile Web Page. (Marks 2) □

Apply colors, spacing, borders, and font styling.

- Create a clean card/container layout for the profile page.
- Make the page responsive for different screen sizes.
- Attach screenshots of your CSS/TailwindCSS code and final styled browser output.

Question 2: Git Repository and Upload

Part 1: Build and initialize a Git repository for your Personal Profile Web Page. (Marks 2)

□ Create a project folder for the Personal Profile Web Page.

- Initialize Git in the project folder using git init.
- Check the repository status using git status.
- Attach a screenshot showing the Git repository initialization/status.

Part 2: Upload the Personal Profile Web Page on the Git repository. (Marks 3)

□ Add your project files to Git using git add .

- Commit your project files using a meaningful commit message.
- Create/connect a remote repository such as GitHub.
- Push/upload your Personal Profile Web Page files to the remote repository. □ Attach a screenshot of the remote repository showing your uploaded files.

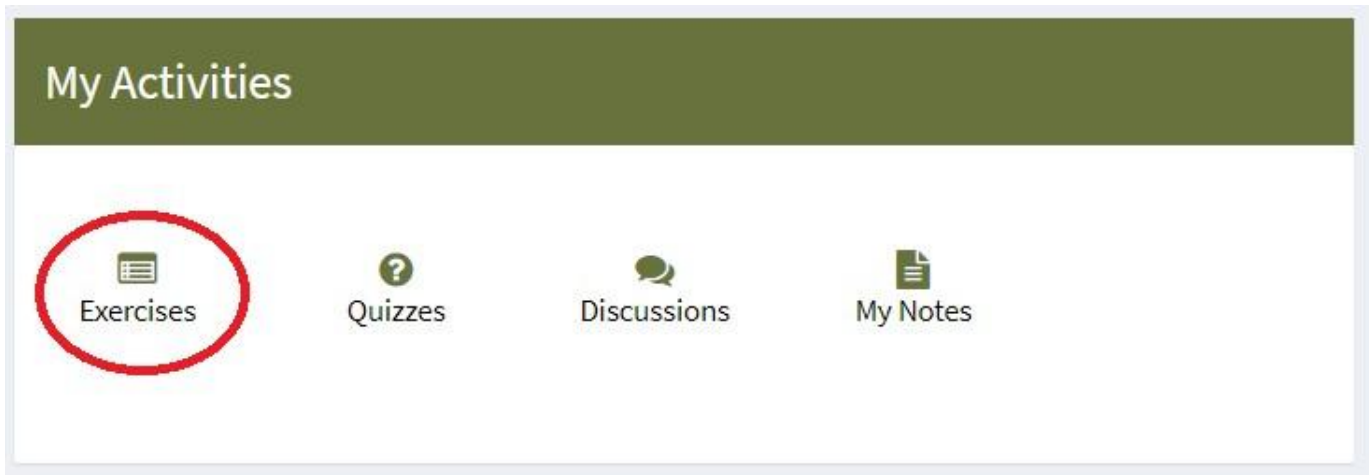

NOTE: Save the code files at your end and only provide screenshots of each step in MS Word File

BEST OF LUCK 😊

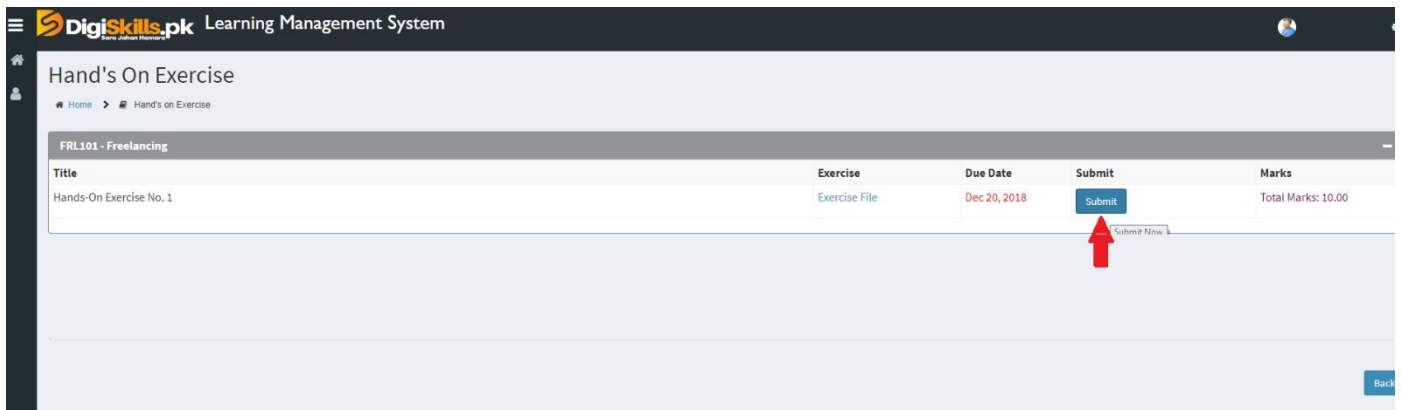

How to submit solution file on LMS?

Please perform the following steps for submitting your solution using LMS:

- 1) Login to the LMS
- 2) Click on the **Exercises** button within the **My Activities** section

- 3) Click on the submit button to upload your Solution.

- 4) Keep in mind to upload your Solution in .doc or .docx format
